

ALZI

Batam, Indonesia | www.alzi.work | www.digisentralsolusi.id | www.snapculler.com

Executive Summary

A versatile Tech Entrepreneur, Director, and Full-Stack Maker with over 5 years of experience in the Information Technology sector. Proven track record in leading digital agencies, architecting IoT and industrial software solutions, driving custom enterprise ERP transformations, and launching independent SaaS products. Expert in engineering proprietary applications with real-time hardware integration for heavy-industry operations and balancing robust IT governance with high-end digital design.

Core Competencies

- **Software Engineering & Product Development:** Full-Stack Development, IoT & Hardware Integration (Weighing Scales), Custom Enterprise App Architecture, Local AI Deployment (Ollama/Docker).
- **Enterprise Systems (ERP):** ERPNext Customization, Technical Data Migration, Standard Operating Procedure (SOP) Authoring.
- **Infrastructure, Networks & Security:** Enterprise NAS Server Architecture, Penetration Testing, Firewall Configuration (Sangfor, Fortinet, pfSense), Corporate Network Analysis, VMWare Server Virtualization.
- **Leadership & IT Governance:** Agency Management, IT Asset & Software Licensing Governance, Google Workspace Administration.
- **Design & Frontend:** UI/UX Redesign, Corporate Website Modernization, Landing Page Optimization.

Professional Experience

Director

PT Digisentral Solusi | Batam, Indonesia

- Lead strategic operations and technical execution for enterprise-grade digital solutions and local infrastructure projects.
- Oversee full-lifecycle client projects, ensuring high-quality deployment of corporate networks, system automation, and tailored software solutions.

IT Support Manager & Network Analyst / ERP Consultant

PT Palma Progress Shipyard | Batam, Indonesia

- **Industrial Software Engineering & IoT (Bollard Pull Test App):** Developed and deployed a proprietary software application designed to completely automate and manage the end-to-end process of Tugboat Bollard Pull Testing. Engineered live data ingestion by integrating the application directly with digital weighing scales/load cells for real-time automated data tracking and instant report generation.

- **End-to-End ERP Transformation:** Spearheaded the custom implementation, deep software customization, and technical data migration of shipyard operations to ERPNext. Authored comprehensive IT and operational Standard Operating Procedures (SOPs) to ensure seamless organization-wide adoption.
- **Website Modernization & Management:** Directed the complete redesign and management of the corporate website to elevate the company's global digital presence and showcase shipyard capabilities.
- **IT Infrastructure & Server Management:** Architected and maintained enterprise NAS Servers to centralize high-definition operational data, while managing comprehensive corporate surveillance systems (CCTV).
- **Cybersecurity & Network Operations:** Monitored, secured, and optimized complex network infrastructures while proactively maintaining cybersecurity protocols to protect corporate assets.
- **IT Governance & Administration:** Managed end-to-end Google Workspace environments, corporate software licensing, and full IT asset inventory tracking.

IT & Cybersecurity Intern

Universitas Internasional Batam (UIB) | Batam, Indonesia | Aug 2019 - May 2022

- **Cybersecurity Analyst (Jan 2022 - May 2022):** Conducted penetration testing on UIB web applications; analyzed and monitored network traffic to detect anomalies, researched vulnerabilities, and configured enterprise firewalls (Sangfor, Fortinet, CSF) alongside open-source alternatives (pfSense, OPNsense, NG Firewall).
- **IT Server Administrator Intern (May 2021 - May 2022):** Maintained on-premise physical servers, managed backup, replication, and disaster recovery pipelines, deployed VMWare server virtualization, monitored server performance via PRTG and Prometheus, and administered CRUD operations for active directory servers (ADDS).
- **IT Network Intern (Jul 2020 - May 2021):** Handled end-to-end troubleshooting of wired (LAN) and wireless infrastructures, managed the layout and relocation of network installations, configured enterprise routing devices (Mikrotik, Cisco, pfSense) and WLAN controllers (Unifi, Sundray), mapped network architectures using VLANs, and audited bandwidth consumption utilizing NTOPNG.
- **Administrative Assistant (Aug 2019 - Jul 2020):** Supported administrative logistics and internal IT resource organization.

Products & Side Projects

Founder & Developer — SnapCuller

www.snapculler.com

- Architected, built, and launched an independent utility application designed for streamlined asset culling and digital workflows.
- Successfully brought the product to market on Gumroad, managing the complete pipeline from MVP development to product positioning and sales.

Developer & Creator — QR Code Contact Maker

qr-code-contact-maker.vercel.app

- Designed and deployed a fast, serverless web utility that allows users to instantly generate QR codes for contact sharing (vCards).

- Focused on building a highly intuitive, minimalist user experience tailored for quick digital networking.

Education

Master's Degree (S2) in Marketing

Specialization: Marketing Strategy & Game Theory application in business.

Bachelor's Degree (S1) in Information Technology

Specialization: Network Analysis & DevOps.
